Work Experience

AI & Emerging Technologies Team Lead · **SC Department of Education** Oct 2026 — Present

- Lead, mentor, and support five developers through regular 1:1s, standups, sprint demos, and code reviews
- Plan and prioritize sprints, estimate work, and ensure projects meet deadlines and quality standards
- Drive modernization efforts, including migrating legacy systems to the cloud and improving existing applications
- Monitor application performance, reliability, and cost to maintain systems and resolve issues quickly

Systems Developer/Programmer II Jul 2025 — Oct 2026

- Utilized AWS services, such as: Lambda, Redshift, S3, IAM, and VPC to develop a data pipeline and modernize existing systems
- Designed various dashboards using Power BI and populated them with data by querying SSMS and Snowflake data using SQL
- Developed Python scripts to assist the development of data pipelines, transferring data from Salesforce to on-prem servers
- Implemented SQL queries to ingest and transform API data for the purpose of generating reports for data requests
- Engineered Copilot Agents to develop various solutions while iteratively collaborating with stakeholders
- Presented technical material during town hall meetings and various district administrators across the state
- Conducted in-depth data analysis to equip stakeholders with insights needed for high-impact business decisions

Prompt Engineer · **Outlier** Oct 2024 — Jun 2025

- Crafted prompts to progressively train generative AI models to write code and adhere to a set of guidelines
- Designed System Instructions (SI) and evaluate multi-turn prompt responses for coherence of the SI against a set of API functions
- Developed responses in natural language and algorithms in Java and Python to simulate model outputs and facilitate the progressive training of generative AI models

Web & Tech Department Manager · **NSTEM** Aug 2023 — Jul 2024

- Supervised department interns, providing mentorship and leading weekly team meetings
- Maintained and optimized company website using WordPress, resolving technical issues and improving functionality

Certifications

AZ-900, Google Agile Essentials, MS C# Fundamentals, REST Engineer

Skills

Programming Languages

Python, SQL, C#, Java, JavaScript, HTML, CSS

Libraries & Frameworks

Pandas, Numpy, React Native, .NET, TensorFlow, PyTorch

Tools & Platforms

Git (GitHub/GitLab), Power BI, Asana, SSMS, MS Office Suite, Docker, WordPress, AWS, dbt, Azure, Visual Studio, Snowflake

Projects

Artificial Intelligence Project

Binary classification model to distinguish images of defective and non-defective potato chips using PyTorch and Keras

Scheduler X

Android app developed in JavaScript using React Native with a Firebase backend. Tested with JUnit and Detox using API-driven data. Developed app website with HTML/CSS

Blackjack

Console-based C# .NET blackjack game, containerized with Docker, backend managed by AWS and SQL Server

Education

University of South Carolina

Bachelor of Science in Computer Science

Bachelor of Arts in Media Arts

International Baccalaureate (IB) Diploma
